Middle Space Powers and Non-State Actors in Outer Space

Wednesday, 18 June 2025 13:15 (1h 30m)

Space is not only for the “great” or “super” powers - there are many “other” powers in space, including what can be loosely referred to as “middle powers”. This panel explores a range of activities and policies in outer space from a diverse range of perspectives, including the Middle East, Latin America, South Asia, and Africa, and considers the impacts of the space age on them as well as their impacts on the continued evolution of the politics of outer space.
