Trade Politics from Above and Below

Wednesday, 18 June 2025 10:45 (1h 30m)

This panel explores contemporary trade politics across a variety of arenas, highlighting the multiplicity of actors that are involved in shaping outcomes. While trade politics all too often focuses on tensions between the US and China, the panel turns elsewhere to examine areas afforded less limelight. Across the papers, the panel explores how power is exercised and by whom within the trade system.
