A Widening and More Complex Security Agenda for Europe

Wednesday 3 June 2026 09:00 (1h 30m)

As European security expands and takes on new meanings, this panel gathers valuable scholarly contributions examining this widening agenda. These include contributions on new technological and scientific developments of the European security landscape, such as border control patents and small nuclear reactors, but also the increasingly securitised discourses around food security and human vulnerability.

Track Classification: European Security Working Group
