## Climate Policy, National Implementation and International Institutions

*Friday 5 June 2026 15:00 (1h 30m)*

This panel examines how climate, energy, and environmental governance unfolds domestically, how international institutions contend with and engage with these domestic realities and what gaps between policy and practice emerge. Beyond polycentric climate governance, the case studies in this panel interrogate in detail implementation realities and what they tell us about the state of climate governance today.
